

I subscribe to receive XM radio in my car and in my home. I pay for this type of radio service. If I am paying for this type of service, why can't I have the weather and traffic information provided to me. The news and weather that comes over my TV, home radio, and plain car radio I do not pay for. I have a NOAA Weather monitor in my home, should I have that stopped because it is providing me with weather information that isn't being broadcasted over the national and local radio stations? So since I PAY FOR XM RADIO, I am paying for the access to traffic and weather information. If I do not want to spend money to receive traffic and weather information, then I would not subscribe to XM radio. Should I have my police scanner not give me my weather information too? Besides when it comes to the weather where I live, I listen to my local TV, radio, and police scanner to know what is happening. Leave XM Radio alone. They give me the radio programs that I want to listen to and pay for. There are channels with programs that I do not listen to on XM Radio, but I still pay to get those channels along with the ones I really do want. Give me my right to choose what I want to listen to and let XM Radio have the right to free speak and provide a service to those who want to pay for it!! Besides, it is a public service to provide traffic and weather information. XM Radio is providing information to protect the health and safety of those who subscribe to its services and to the general public as well. If you do not think that people will tell their friends and neighbors of traffic problems or severe weather, think again. When you live in Torando Alley, you need all the help in being alerted as you can get!!!! Leave XM Radio alone and let them give the people what they want. They would not be in business if the public did not want to pay for radio programs.
